MEMORANDUM FOR: Chief, Classification & Wage Division, CIA  
FROM : Acting DAD/SI  
SUBJECT : Table of Organization for Scientific Analysis  
Division, SI

1. Attached is a recommended revised Table of Organization for SAD/SI. A general description of duties and requirements is also included as justification for higher position grade levels requested.

2. The Scientific Analysis Division conducts for OSI one of the most important phases of its work -- all source research in depth on priority office problems. The need for greater reliance on research for the answers to scientific intelligence problems makes it necessary to provide SAD with a grade structure capable of attracting and maintaining a stable, highly qualified group of analysts.
